**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Samuel Dangremond on January 29, 2009

The application has been amended as follows:

In the claims:

Claim 1, line 8, "superposition or winding of the layers of prepreg fibers" has been changed to --superposition or winding layers of prepreg fibers-- .

Claim 1, line 10, "the boundary wall for the stream of gases flowing through the guide vanes", has been changed to --a boundary wall for flowing streams of gas through guide vanes--.

Claim 1, line 11 "said separate structural elements are imidized", has been changed to, --said separate structural elements are introduced into an imidization cycle-

--.

Claim 1, line 13, "the external layers comprising prepreg fibers are added in order to form the part", has been changed to --the external layers comprising prepreg fibers are added to a pressure and suction side of the blade in order to form the part--.

Claim 5, line 9, "until the end of the cooling", has been changed to --until the end of the curing--.

Claim 7, line 15, "until the end of the cooling", has been changed to --until the end of the curing--.

***Allowable Subject Matter***

3. The following is a statement of reasons for the indication of allowable subject matter:

Several of the limitations taught by claim 1 are well known in the art (separate assembly, imidization, reinforcement fibers, molding, and curing). For example, Munk et al. U.S. Patent No. 6,036,900 teaches imidizing a high temperature, fiber reinforced composite, followed by molding and curing (Abstract). However Munk fails to address the separate assembly, the external layers, as well the overall structure of the composite the applicant is producing. There was no prior art found which could justifiably provide motivation to combine all of the limitations of claim 1, while incorporating, the particular

structure provided by the applicant, (an outer and inner platform (3, 4) connected to each other by a full blade (2a & 2b), which is then modified by the addition of external layers, and molded/cured.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Any inquiry concerning this communication or earlier communications from the examiner should be directed to OMAR SIDDIQUE whose telephone number is (571)270-5515. The examiner can normally be reached on Monday-Friday 9AM-5AM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Griffin can be reached on 1-571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
